● SKILLS

Cloud computing | Software testing | Test-driven development. | Team-work oriented | Critical thinking | Organizational and planning skills | Microsoft Office package: Microsoft Word, Excel, PowerPoint, Access | C#, DotNet, Javascript, HTML, CSS, SQL, PHP languages | Network Maintenance and Troubleshooting | Network services and protocols (DHCP, DNS, HTTP, TCP, UDP, IMAP3) | I am proactive/self-starter and fast learner | I.T. Troubleshooting

● PROJECTS

Don't destroy Terra

- Developed a 2D game using Unity Engine and C# that was created during my final year project for my Computer Science BSc.
- The concept is to teach the players the importance of protecting the Earth by displaying the ways humans harm the environment.
- This project's main idea was to solve one of UN global problem with the help of gaming.
 - Created a well structured level design.

Healthify

- During the second-year group project a health web application was created that allows connection between the web application to the SQL database that allows anyone to get consultations from health professionals.
 - Prototyped and planned the web application and created the SQL Database.
- JavaScript, HTML, CSS front-end technologies have been used to further develop the application.
